SUMMARY

Unity Developer with experience building and shipping mobile and cross-platform games, including live-ops, monetization, SDK integration, and performance optimization. Strong background in C#, Unity3D, multiplayer systems, analytics, and deploying titles to iOS, Android, Steam, and console platforms.

EXPERIENCE

Unity Developer

Mad Hook — Amman, Jordan | Aug 2024 – Present

- Developed and maintained core gameplay systems and mechanics in Unity3D and C# with a focus on clean architecture and SOLID principles.
- Contributed to multi-platform titles across lifecycles: Amer Tycoon: Idle (built from scratch), Highway Drifter: Hajwala Online (Mobile, Steam, PS4/PS5), UHD (Mobile), Amer: The Chase (Mobile), and Rooftop Run.
- Managed full deployment pipeline for all company titles including iOS and Android store submissions, Unity engine version upgrades, SDK updates, and policy compliance/violation resolution.
- Balanced game economy and progression systems, focusing heavily on engagement loops, monetization pacing, and game polish elements (VFX, audio feedback, and micro-interactions).
- Integrated third-party SDKs including AdMob, AppLovin, GameAnalytics, Facebook, and Firebase for telemetry, marketing attribution, and ad monetization.
- Applied advanced performance optimization techniques: occlusion culling, GPU instancing, draw call reduction, texture atlasing, object pooling, light baking, and LOD systems, using profiling tools to optimize target frame rates.
- Engineered custom gameplay scenes optimized for User Acquisition (UA) video campaigns and developed interactive playable ad formats to drive conversion rates.
- Collaborated with design, art, QA, and marketing teams using Jira and PlasticSCM in an Agile workflow.

Unity Developer and Instructor

Maysalward — Amman, Jordan | Mar 2024 – Jun 2024

- Implemented features and content updates for live mobile games in Unity3D.
- Delivered technical training on C# scripting, Unity UI architecture, animation state machines, and mobile optimization.
- Tested and debugged Android and iOS builds to ensure stability and performance.

Unity Developer, Self-Employed

Independent Unity Developer — Amman, Jordan | Dec 2023 – Mar 2024

- Built and self-published Realistic Hajwala for iOS and Android from concept to release.
- Implemented multiplayer gameplay using Photon PUN2.
- Managed ad mediation and analytics integration with AdMob, GameAnalytics, Firebase, and Facebook SDK.
- Ran paid user acquisition campaigns using Meta Ads Manager and Google Ads.

Full-Stack Web Developer and IT Support

Aramad Information Technology Inc. — Charlottetown, PEI, Canada | Feb 2021 – Dec 2023

- Developed and maintained 20+ client websites using HTML, CSS, JavaScript, PHP, and WordPress.
- Implemented SEO, keyword research, and asset optimization improvements.
- Built a WHMCS reseller platform for automated hosting provisioning and billing.

PROJECTS

Realistic Hajwala — Solo Indie Mobile Game

Dec 2023 – Present

- **Analytics & Scale:** Managed live-ops for a self-published title reaching 100,000+ total downloads, maintaining a steady player base averaging ~1,000 Android DAU (30k MAU) and ~500 iOS DAU (7k MAU).
- **User Acquisition:** Attained highly optimized paid UA efficiency with an Android Cost-Per-Install (CPI) of \$0.0019 (~21,791 installs for \$50 via Google Ads) and an iOS CPI of \$0.113 (~442 installs for \$50 via Meta Ads).
- **Retention & Revenue:** Analyzed critical monetization metrics to track iOS Day 1 retention at 32.6% and Day 7 at 6.1%, growing monthly ad-driven revenue by 86% over two months with an iOS LTV of ~\$0.021 per user.
- **Strategic Roadmap:** Formulated iterative update schedules identifying Day 7 retention loops and Android monetization configurations as highest-impact areas prior to scaling marketing spend.

SKILLS

- **Programming:** C#, C, Java, Python, JavaScript, PHP, HTML, CSS, SQL.
- **Game Development:** Unity3D, Photon PUN2, Blender, Photoshop, object pooling, LOD, GPU instancing, profiling.
- **SDKs & Services:** AdMob, AppLovin, GameAnalytics, Firebase, Facebook SDK, WHMCS, cPanel, WHM.
- **Workflow & Tools:** Git, PlasticSCM, Jira, Trello, VMware, Visual Studio, VS Code.
- **Architecture:** SOLID principles, clean code architecture, Agile/Scrum, code reviews, design patterns.
- **Platforms:** iOS, Android, Steam, PlayStation (PS4/PS5).

EDUCATION

University of Prince Edward Island

Jan 2020 – May 2023

Completed 3 years toward B.Sc. in Computer Science, Video Game Programming Specialization. GPA: 3.70/4.0.

King's Academy

Aug 2013 – May 2017

American High School Diploma, Tawjihi Equivalency: 90.3%. GPA: 3.91/4.0.
